

Additional Services

Claims

Perry Appleton Risk Services Limited are proud to provide our clients with an in-house claims handling department. Although most incidents can be handled these days via helplines, more complex Commercial claims need additional expertise, help and guidance.

We include, as part of our service, initial registering of the claim to your insurer, assistance with completion of claim forms where necessary, accompanied meetings with insurer Loss Adjusters and general guidance through the whole process.

In addition to our own in-house claims service, we have negotiated a discounted cost for provision to our clients of Commercial Loss Recovery Insurance via LOREGA. This product provides cover for a qualified, independent Chartered Loss Adjuster to support our clients throughout a commercial property claim.

Risk Management

Risk Management continues to be an issue for today's complex business environment. Our aim is to help our clients manage the risks to their business in a cost-effective way, whilst meeting their legal obligations and enabling us to provide a straightforward insurance solution you can rely on. Perry Appleton Risk Services Limited have access to a number of Risk Management Solutions available to our clients which provide health, safety, environmental and business continuity training & consultancy.
